FOCUS

La colección FOCUS tiene un claro elemento diferenciador. La aplicación de la granilla concentrada en diferentes partes de la superficie cerámica donde más nos interesa enfatizar o destacar el dibujo de la gráfica. Aplicando esta tecnología renunciamos a la manera clásica de fabricar relieves en cerámica como es el uso de platos.

There's something clearly different about the FOCUS collection. Concentrated grit is applied to the different parts of the ceramic surface to emphasize or highlight the graphic design. Using this technology does away with the traditional process of producing relief on the ceramic as is done with dishes.

TAU
cerámica

Aporta mucha personalidad a las piezas generando unos altos y bajos relieves nunca antes logrados.

Plus, this technique adds great personality to each piece for never-before-seen high and low reliefs.

BORRIOLSTONE

TAU
cerámica

La piedra de Borriol es una piedra arenisca original de las canteras de Castellón, concretamente de la localidad de Borriol. Una serie con una trama gráfica uniforme y sin demasiadas destonificaciones, ideal para dar continuidad a los espacios.

Los porcelánicos efecto pétreo son una clara tendencia en espacios interiores y exteriores desde hace un par de años. Su gráfica nos recuerda al estilo neopresionista de finales del siglo XIX conocido como puntillismo.

Borriolstone is a sandstone originally from quarries in Castellón, specifically the town of Borriol. It's a series with a uniform graphic look without much difference in tone and is ideal for bringing a little continuity to any space.

Stone-effect porcelain has been a clear trend in interiors and exteriors for a couple of years now. The graphic look seems much like the late 19th century neo-impressionism style known as pointillism.

Esta serie está inspirada en las piedras volcánicas del sur de Italia. Su variación gráfica es uniforme y aleatoria con claros desgastes en diferentes partes de las piezas, también encontramos algunas marcadas vetas en los extremos de la superficie.

Una serie elegante y con mucha personalidad para aportar a los espacios un toque distintivo y memorable.

This series is inspired by the volcanic stone from the south of Italy. The graphic variation is uniform and random with obvious wear in different parts of each piece. Some marked veins can also be found on the ends of the surface. |

It's an elegant series with a whole lot of personality for a different kind of memorable touch.

NAICA GREEN

TAU
cerámica

La cuarcita Naica es una roca metamórfica muy dura que se originó como arenisca. La cuarcita viene naturalmente en dos tonos diferentes: blanco o gris, aunque con un tono sutil de rojo, azul, verde o rosa, gracias a algunas impurezas.

Este rasgo en particular no se replica en ninguna otra elección de piedra y, por lo tanto, la razón por la que la cuarcita Naica es la "piedra lujosa" de facto.

Naica quartzite is a very hard metamorphic rock that originated from sandstone. Quartzite is found in two different tones in nature: white or grey; however, it can also be found in a subtle red, blue, green or pink tone due to certain impurities.

This feature in particular is not replicated in any other choice of stone and, therefore, this is the reason why Naica quartzite is the "luxury stone".

Marble

SAHARA WHITE

TAU
cerámica

Sahara White es un mármol de base blanca y rayas amarillo dorado de Grecia (Platanotopos, Eleftereopolis, Kavala, Macedonia Oriental).

Muy utilizado para grandes superficies debido a su blancura y a sus detalles dorados, aportan un ambiente de lujo y clase, propios de palacios y templos.

La peculiaridad de sus vetas alineadas poco comunes en el mundo del mármol hacen que en ocasiones se utilice para técnicas decorativas como open book o mirrored es por esto que también se le da el nombre Golden spider.

Sahara White is marble with a white base and golden yellow streaks from Greece (Platanotopos, Eleftereopolis, Kavala, Eastern Macedonia).

Widely used for large surfaces due to the whiteness and golden details, it creates a luxurious atmosphere full of class worthy of palaces and temples.

Because of the uniqueness of the aligned veins, not at all common in the marble world, it is often used for decorative techniques like open book or mirrored looks. And that's why it's also known as Golden Spider.

LEMA

TAU
cerámica

El cemento ha sido uno de los primeros materiales de construcción a lo largo de la historia.

Fuentes históricas datan que fueron los egipcios (2.600 AC) los primeros en utilizar una mezcla similar al mortero para unir bloques de piedra y poder así levantar sus espectaculares construcciones.

La serie lema rinde homenaje a esos primeros materiales cementosos que empleó el ser humano para el desarrollo de las civilizaciones.

Cement was one of the very first construction materials ever to be used in history.

Historical sources indicate the Egyptians (2600 BC) were the first to use a blend similar to mortar to join stone blocks and thus build their spectacular structures.

The LEMA series pays homage to those first cement-like materials used by human beings to develop civilizations.

El color blanco tiene muchos significados dependiendo de la cultura en la que esté presente. En el mundo occidental, el color blanco está asociado con la paz, la pureza y la limpieza.

Es un color neutro que no está asociado a un género particular. En cerámica es uno de los colores más demandados y prescritos para espacios reducidos.

The color white has many meanings depending on the culture in which it is present. White is associated with peace, purity and cleanliness.

It is a neutral color that is not associated with a particular gender. In tiles it is one of the most demanded and prescribed colors for reduced spaces.
